

# AKRAM TAHA ZEYAD

AI Researcher | Assistant Lecturer | PhD Candidate – NLP & Multilingual RAG Systems

+60 17-434 0106 | Kajang, Selangor, Malaysia | [linkedin.com/in/akram-t-44a095b6](https://www.linkedin.com/in/akram-t-44a095b6) | [github.com/Akramtahaxzx](https://github.com/Akramtahaxzx)

## PROFESSIONAL SUMMARY

PhD candidate at Universiti Kebangsaan Malaysia specializing in Multilingual Retrieval-Augmented Generation (RAG) and LLM fine-tuning for Arabic and Malay low-resource languages. Assistant Lecturer and AI researcher with 4+ years of teaching experience, 3 published AI papers, and hands-on expertise in Python, deep learning, NLP, and computer vision. Proven ability to design, build, and deploy end-to-end ML pipelines for healthcare and education applications. Malaysia International Scholarship (MIS 2025) recipient.

## CORE COMPETENCIES

**Languages & Frameworks:** Python • PyTorch • TensorFlow • Hugging Face Transformers • Django • Flask

**NLP & LLM:** RAG Systems • LoRA / PEFT Fine-tuning • mT5 • XLM-RoBERTa • Multilingual NLP • Text Classification

**ML & Data:** Computer Vision • Deep Learning • OpenCV • scikit-learn • Data Analysis • SQL / NoSQL

**Tools & Platforms:** Git / GitHub • MATLAB • LangGraph • CrewAI • AutoGen • FAISS / Vector DBs

**Languages (Human):** Arabic (Native) • English (Professional) • Malay (Basic)

## WORK EXPERIENCE

### Assistant Lecturer

Oct 2025 – Present

**University of Technology-Iraq** | Baghdad, Iraq

- Design and deliver lectures on Python programming and Artificial Intelligence, achieving a 30% improvement in student comprehension scores.
- Lead AI research initiatives resulting in 3 peer-reviewed publications on healthcare and education AI applications.
- Collaborate with faculty to redesign the Computer Science curriculum, improving relevance and student engagement.
- Mentor 50+ students on AI capstone projects, guiding all advised students to top assessment marks.
- Develop lab exercises covering machine learning, data science, and deep learning fundamentals.

### Assistant Engineer

Apr 2023 – Oct 2025

**University of Technology-Iraq** | Baghdad, Iraq

- Supported faculty and student engineering projects by planning, executing, and optimizing technical workflows.
- Resolved hardware and software technical issues, maintaining continuous operational effectiveness across departments.
- Built and deployed Python-based applications and data pipelines to improve research and teaching efficiency.
- Utilized engineering software tools to streamline project workflows and reduce turnaround time.
- Provided technical mentorship to students, contributing to improved academic outcomes.

### Technical Support Engineer

Dec 2021 – Sep 2022

**HRINS Company** | Baghdad, Iraq

- Resolved 200+ customer technical issues monthly, sustaining a 95% customer satisfaction rate.
- Implemented a new ticketing system that cut average response time by 30%.
- Trained new team members on diagnostic procedures and customer service protocols.

- Collaborated with product engineers to identify and patch software bugs, improving overall system stability.
- Developed and maintained a self-service knowledge base, increasing self-service support usage by 20%.

### Telephone & Medical Equipment Technician

Nov 2019 – Sep 2020

AI-Wahj Company | Baghdad, Iraq

- Diagnosed and repaired telephone and medical equipment, ensuring high uptime for healthcare clients.
- Applied systematic troubleshooting methodologies to minimize equipment downtime.
- Maintained accurate service records to support continuous quality improvement.

## EDUCATION

---

### PhD – Information Science & Technology (NLP / AI)

2026 – Present

Universiti Kebangsaan Malaysia (UKM) | Bangi, Malaysia

- Research focus: Multilingual RAG-enhanced dialogue systems for Arabic and Malay low-resource languages.
- Combining RAG with LoRA/PEFT fine-tuning of the mT5 multilingual model; Arabic retrieval accuracy ~0.880.
- Supported by Malaysia International Scholarship (MIS 2025); supervised by Dr. Lailatul Qadri Zakaria.

### Master of Artificial Intelligence

Sep 2022 – Mar 2024

Universiti Kebangsaan Malaysia (UKM) | Bangi, Malaysia

- Thesis: Designed and evaluated deep learning models for medical image analysis and education-focused AI tools.
- Applied data augmentation and hyperparameter tuning to improve model robustness.
- Built end-to-end ML pipelines using Python, PyTorch/TensorFlow, OpenCV, and scikit-learn.
- Relevant coursework: Deep Learning, Computer Vision, NLP, Reinforcement Learning, Advanced Statistics.

### BSc – Computer Engineering

Dec 2016 – Sep 2021

University of Technology | Baghdad, Iraq

- Capstone: Real-time object detection embedded vision system using OpenCV and a lightweight CNN on low-power hardware.
- Coursework: Digital Systems, Algorithms, Embedded Systems, Signal Processing, C/C++, Python, Microcontrollers.

## RESEARCH & PUBLICATIONS

---

- 3 peer-reviewed AI publications in healthcare and education domains (University of Technology-Iraq, 2023–2025).
- Co-author: APO-DRL framework for IoT/5G optimization in revision for IEEE IoT Journal / Sensors MDPI (2025).
- Co-author: PII redaction in Arabic–English code-mixed text using XLM-RoBERTa + LoRA + regex (2026).
- Literature review in progress: Arabic and Malay absence from RAG evaluation benchmarks target journal: JAIR (WOS Q1).

## NOTABLE PROJECTS

---

- Multilingual RAG+LoRA Dialogue System (PhD prototype): mT5-small fine-tuned with PEFT; Arabic BLEU 0.880, Malay BLEU 0.733.
- PaperBrief: AI-powered research paper summarizer with freemium model; zero-cost deployment via Gemini Flash & Groq APIs.
- Multi-agent AI framework comparison: CrewAI vs AutoGen vs LangGraph — academic publication in progress.
- Wikipedia Traffic Forecasting: Multilingual time-series forecasting model across multiple languages.

## ADDITIONAL INFORMATION

---

**Scholarships:** Malaysia International Scholarship (MIS 2025)

**Student ID:** P167252, FTSM, Universiti Kebangsaan Malaysia

**Nationality:** Iraqi
